Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
  – *there may be more space than you need.*
- **Calculators may not be used.**
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- You must **show all your working out**.

Information

- The total mark for this paper is 80
- The marks for **each** question are shown in brackets
  – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

8 Bernard says,

"When you halve a whole number that ends in 8, you always get a number that ends in 4"

(a) Write down an example to show that Bernard is wrong.

$$\frac{18}{2} = 9$$

(1)

Alice says,

"Because 7 and 17 are both prime numbers, all whole numbers that end in 7 are prime numbers."

(b) Is Alice correct?
You must give a reason with your answer.

depth
9 inches

Chris has a bag.

It has
height 50 cm
width 40 cm
depth 20 cm

1 inch = 2.54 cm

Can Chris take this bag on the plane?
You must show your working.

No   height, depth ok
but too wide

$$2.54$$
$$\underline{\quad 14}$$
$$1016$$
$$\underline{2540}$$
$$35.56 \, cm \quad \text{width limit}$$

Mrs Bridges is going to cover the floor with boards.
Each board is rectangular in shape.

Each board is 1.2 m long and 1 m wide.

Mrs Bridges has 150 boards.
Does she have enough boards?
You must show how you get your answer.

19 A shop sells milk in 1 pint bottles and in 2 pint bottles.

Each 1 pint bottle of milk costs 52p.
Each 2 pint bottle of milk costs 93p.

Martin has **no** milk.

He assumes that he uses, on average, $\frac{3}{4}$ of a pint of milk each day.

Martin wants to buy enough milk to last for 7 days.

(a) Work out the smallest amount of money Martin needs to spend on milk.
You must show all your working.

$$\frac{7}{1} \times \frac{3}{4} = \frac{21}{4} = 5\frac{1}{4} \text{ pints per week}$$

Needs to buy 3×2 pint bottles

$$\begin{array}{r} 93 \\ \underline{3 \times} \\ 279p \end{array} = £2.79$$

£ 2.79

(3)

Martin actually uses more than $\frac{3}{4}$ of a pint of milk each day.

(b) Explain how this might affect the amount of money he needs to spend on milk.

He may need to buy more than 6 pints
per week which would mean spending
more money on milk.

21 A box exerts a force of 140 newtons on a table.
The pressure on the table is 35 newtons/m².

Calculate the area of the box that is in contact with the table.

$$p = \frac{F}{A}$$

$p =$ pressure
$F =$ force
$A =$ area

$$p = \frac{F}{A}$$

$$Ap = F$$

22 There are only red counters, blue counters, green counters and yellow counters in a bag.

The table shows the probabilities of picking at random a red counter and picking at random a yellow counter.

Colour	red	blue	green	yellow
Probability	0.24	0.22	0.22	0.32

The probability of picking a blue counter is the same as the probability of picking a green counter.
Complete the table.

$$0.24 + 0.32 = 0.56$$
$$1 - 0.56 = 0.44$$

25 Four friends each throw a biased coin a number of times.
The table shows the number of heads and the number of tails each friend got.

	Ben	Helen	Paul	Sharif	
heads	34	66	80	120	*300*
tails	8	12	40	40	*100*
	42	*78*	*120*	*160*	

The coin is to be thrown one more time.

(a) Which of the four friends' results will give the best estimate for the probability that the coin will land heads?
Justify your answer.

Sharif - most throws of coin

(1)

Paul says,
"With this coin you are twice as likely to get heads as to get tails."

(b) Is Paul correct?
Justify your answer.

He is based on his results 80 : 40

(2)

The coin is to be thrown twice.

(c) Use all the results in the table to work out an estimate for the probability that the coin will land heads both times.

$$P(Head) = \frac{300}{400} = \frac{3}{4}$$

$$P(2\ Heads) = \frac{3}{4} \times \frac{3}{4} = \frac{9}{16}$$
