GCSE Mathematics (1MA1) - Foundation Tier Paper 3F
October 2016 mock paper mark scheme

## NOTES ON MARKING PRINCIPLES

## Guidance on the use of codes within this mark scheme

M1 - method mark. This mark is generally given for an appropriate method in the context of the question. This mark is given for showing your working and may be awarded even if working is incorrect.

P1 - process mark. This mark is generally given for setting up an appropriate process to find a solution in the context of the question.

A1 - accuracy mark. This mark is generally given for a correct answer following correct working.

B1 - working mark. This mark is usually given when working and the answer cannot easily be separated.

C1 - communication mark. This mark is given for explaining your answer or giving a conclusion in context supported by your working.

In some cases full marks can be given for a question or part of questions where no working is seen. However, it is wise to show working for one small slip could lead to all marks being lost if no working is shown.

Some questions (such as QWC) require all working to be shown; in such questions, no marks will be given for an answer with no working (even if it is a correct answer).

Note that in some cases a correct answer alone will not score marks unless supported by working; these situations are made clear in the mark scheme. Examiners are prepared to award zero marks if the student's response is not worthy of credit according to the mark scheme.

## Question 1 (Total 1 mark)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | 42000 | B1 | This mark is given for the correct answer <br> only |

## Question 2 (Total 1 mark)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $3.05,3.2,3.205,3.25$ | B1 | This mark is given for the correct answer <br> only |

## Question 3 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | 4 | B1 | This mark is given for the correct answer <br> only |
| (b) | $(5+6+7+5+3+6+7)-$ <br> $(7+6+6+3+2+4+4)$ <br> or <br> $(5-7)+(6-6)+(7-6)+(5-3)+$ <br> $(3-2)+(6-4)+(7-4)$ | M1 | This mark is given for a method to for ti <br> find the difference in hours of sunshine |
| 7 | A1 | This mark is given for the correct answer <br> only |  |

## Question 4 (Total 3 marks)

$\left.\begin{array}{|c|l|c|l|}\hline \text { Part } & \begin{array}{l}\text { Working an or answer examiner might } \\
\text { expect to see }\end{array} & \text { Mark } & \text { Notes } \\
\hline & 45 \div 2.85(=15.789 \ldots) & \text { P1 } & \begin{array}{l}\text { This mark is given for a start to a process } \\
\text { to find the solution }\end{array} \\
\hline & 15 \times 2.85=42.75 \\
45-42.75=\end{array} \right\rvert\,$ P1 \(\left.\begin{array}{l}This mark is given for a complete process <br>
to find the amount of change Ben should <br>

get\end{array}\right] .\)| A1 |
| :--- |
| 2.25 |
| only mark is given for the correct answer |

## Question 5 (Total 5 marks)

| Part | Working or answer an examiner might expect to see | Mark | Notes |
| :---: | :---: | :---: | :---: |
| (a) | $\qquad$ | C1 | This mark is given for a correct pattern drawn |
| (b) | $4,6,8,10,12,14, \ldots$ | M1 | This mark is given for a evidence of interpretation: a number sequence or further patterns drawn |
|  | 16 | A1 | This mark is given for the correct answer only |
| (c) | e.g. pattern 10 has 22 squares | C1 | This mark is given for a start to an explanation or counterexample |
|  | No; pattern number 10 has 22 squares and pattern number 20 has 42 squares, not 44 squares | C1 | This mark is given for a complete explanation |

## Question 6 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $2,3,5,7,11,13, \ldots$. | M1 | This mark is given for a method to <br> identify two different prime numbers |
| $2+7=9$ <br> or <br> $3+13=16$ <br> or <br> $2+23=25$, etc | C1 | This mark is given for a counterexample <br> shown |  |

## Question 7 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see <br> (a) | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (b) | $1,2,2,3,3,6,7,8$ | B1 | This mark is given for the correct answer <br> only |
|  | M1 | This mark is given for a method of listing <br> the numbers in order and identifying the <br> middle two numbers as 3 |  |
|  | 3 | A1 | This mark is given for the correct answer <br> only |

October 2016 GCSE Mathematics 1MA1 - Paper 3F mock mark scheme

## Question 8 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $\frac{3}{5} \times 195(=117)$ <br> or <br> $\frac{2}{3} \times(375-195)(=120)$ | P1 | This mark is given for a process to start <br> finding a solution |
|  | $\frac{3}{5} \times 195+\frac{2}{3} \times(180)$ | P1 | This mark is given for a complete process <br> to find a solution |
|  | 237 | A1 | This mark is given for the correct answer <br> only |

## Question 9 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| 0.21 or 19500 P1 <br> $19500 \div 210$ <br> or <br> $19.5 \div 0.21$ This mark is given for a process for <br> converting between $\mathrm{m} l$ and $l$ <br>  92 | This mark is given for a process to find <br> out how many cups can be completely <br> filled |  |  |

## Question 10 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $4.5 \mathrm{~cm}, 6 \mathrm{~cm}$ or 7.5 cm <br> $9 \mathrm{~km}, 12 \mathrm{~km}$ or 15 km | M1 | This mark is given for a method of <br> measuring of one of the lines, $\pm 2 \mathrm{~mm}$, <br> and scaling $(\times 2)$ |  |
|  | M1 | This mark is given for a complete method <br> to find $A B+B C-A C$ (scaled or <br> unscaled) |  |
|  | 6 | A1 | This mark is given for an answer in range <br> $4.8-7.2$, supported by correct working |

## Question 11 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $78: 52$ | M1 | This mark is given for a method to for <br> representing as a ratio |
|  | $3: 2$ | A1 | This mark is given for the correct answer <br> only |

## Question 12 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $A B C=46^{\circ}$ <br> vertically opposite angles are equal <br> or <br> $B A C=180^{\circ}-113^{\circ}\left(=67^{\circ}\right)$ <br> angles on a straight line add to $180^{\circ}$ | M1 | This mark is given for a method leading to <br> the evaluation of another angle in triangle <br> $A B C$ |
|  | $A C B=67^{\circ}$ <br> angles in a triangle add up to $180^{\circ}$ | A1 | This mark is given for the correct answer <br> only |
|  | C1 | This mark is given for all appropriate <br> reasons related to method shown |  |
|  | C1 | This mark is given for a concluding <br> statement |  |
| $A C B=B A C=67^{\circ}$ <br> an isosceles triangle has two equal angles | ( |  |  |

## Question 13 (Total 3 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $\frac{8}{10}$ and $\frac{43}{56}$ | P1 | This mark is given for a process to start <br> making a comparison |
|  | $80 \%$ and $76.7 \ldots \%$ <br> or <br> $56 \times 0.8=44.8$ | This mark is given for a complete process <br> to give values that can be used for <br> comparison |  |
|  | No, the advert is not supported | A1 | This mark is given for the correct <br> statement with supporting working |

## Question 14 (Total 3 marks)

## Question 15 (Total 5 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | 8,11, or 16 seen | M1 | This mark is given for a method to <br> substitute 1,2 or 3 into $n 2+7$ |
|  | $8,11,16$ | A1 | This mark is given for the correct answer <br> only |
| (b) | $\sqrt{ }(128-7)=11 ; 11$ th term | B1 | This mark is given for the correct answer <br> only |

## Question 16 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| $\div 20 \times 50$ <br> or <br> $50 \div 20(=2.5)$ | M1 | This mark is given for a method to find <br> the right amounts for 50 walnut biscuits |  |
|  |  | A1 | This mark is given for 2 or 3 amounts <br> correct |
|  | $125,250,100,125,5$ | A1 | This mark is given for all amounts correct |

## Question 17 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $2 y 3$ | B1 | This mark is given for the correct answer <br> only |
| (b) | $m(m+1)$ | B1 | This mark is given for the correct answer <br> only |
| (c) | $c-5=3 h$ <br> or <br> $\frac{c}{3}=\frac{3 h+5}{3}$ | M1 | This mark is given for subtracting 5 from <br> both sides <br> or <br> dividing each term by 3 as a first step |
| $h=\frac{c-5}{3}$ | This mark is given for the correct answer <br> only |  |  |

## Question 18 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $24,48,72,96,120, \ldots$ <br> $20,40,60,80,100,120, \ldots$ | P1 | This mark is given for a process to list <br> multiples of 24 and 20 with at least 3 <br> numbers in each list, or an expansion of <br> 24 and 20 into factors |  |
|  | 120 minutes (or 2 hours) | A1 | This mark is given for a correct answer <br> identifying the lowest common multiple <br> (LCM) |
|  | 9.30 a.m. | A1 | This mark is given for a correct answer <br> only |

## Question 19 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $(x+5)_{2}(x+5)_{2}=$ C1This mark is given for a correct for <br> expansion of $(x+5)_{2}$ with at least 3 terms <br> correct <br> or for a substitution of the same number <br> into both expressions (counterexample) |  |  |  |
|  | $(x+5)_{2}=x_{2}+10 x+25$ <br> Azmol is wrong; $x_{2}+10 x+25 \neq x_{2}+25$ for <br> all values of $x$ | C1 | This mark is given for a correct <br> evaluation of both expressions |

## Question 20 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $105 \div(5-2)(=35)$ <br> Kim gets $£ 70$, Molly gets $£ 175$ | P1 | This mark is given for a strategy to start <br> to solve the problem |
| $385-(2 \times 35)-(5 \times 35)(=140)$ <br> or <br> $(385 \div 35)-2-5(=4)$ | P1 | This mark is given for a process to find <br> Laura’s share |  |
| $\frac{140}{385} \times 100$ |  |  |  |
| or $\frac{4}{11} \times 100$ | P1 | This mark is given for a process to find <br> the percentage Laura gets |  |
| $36.4 \%$ | A1 | This mark is given for an answer in range <br> 36.3 to 36.4 |  |

## Question 21 (Total 2 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| Points are joined with a curve, not with <br> line segments | C 1 | This mark is given for a correct statement |  |
|  | Points should be plotted at mid-points of <br> the intervals, not end points | C 1 | This mark is given for a correct statement |

## Question 22 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $5 \%=2.30 ; 100 \%=20 \times 2.30$ | M1 | This mark is given for a method to link <br> $5 \%$ with 2.30 or $100 \div 5(=20)$ |
|  | 46 | A1 | This mark is given for a correct answer <br> only |

## Question 23 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $(180 \times 3) \div 5(=108)$ <br> or <br> $360 \div 5(=72)$ | P 1 | This mark is given for a process to find <br> either an interior or an exterior angle of <br> the pentagon $A B C D E$ |
| $F C D=C D F=72$ <br> $C F D=180-72-72$ | P 1 | This mark is given for a complete process <br> to find angle $C F D$ |  |
| 36 | A1 | This mark is given for a correct answer <br> only |  |

## Question 24 (Total 6 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $\pi \times 4.22(\div 2)$ | P1 | This mark is given for a process to find <br> the area of circle or semicircle |
|  | $(8.4 \times 5.6)+\frac{\pi \times 4.2^{2}}{2}$ | P1 | This mark is given for a process to find <br> the area of the garden (= 74.7...) |
|  | $74.7 \div 12(=6.22$, so 7 boxes required $)$ | P1 | This mark is given for a process to find <br> number of boxes required |
|  | $7 \times 4.99$ | P1 | This mark is given for a process to find <br> the cost of 7 boxes |
|  | 34.93 | A1 | This mark is given for a correct answer <br> only |
| (b) | Carol might need to buy fewer boxes | C1 | This mark is given for a correct statement |

## Question 25 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $\frac{4}{7}, \frac{3}{7}$ | B1 | This mark is given for two correct <br> answers only |
|  | $\frac{3}{8}, \frac{5}{8}, \frac{3}{8}, \frac{5}{8}$ | B1 | This mark is given for four correct <br> answers only |
|  | M1 | This mark is given for a method to find <br> the probability of two red pens |  |
|  | $\frac{15}{56}$ | A1 | This mark is given for a correct answer <br> only |

## Question 26 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $3.4 \times 108$ | B1 | This mark is given for the correct answer <br> only |
| (b) | $\frac{0.000000167}{0.00911}$ | M1 | This mark is given for converting at least <br> one number <br> or <br> for digits 183 seen |
|  | 0.0000183 | A1 | This mark is given for an answer in the <br> range 0.0000183 to 0.000018332 |

## Question 27 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $\tan x=\frac{1.9}{3.2}$ | M1 | This mark is given for a method to recall <br> the appropriate formula |  |
|  | 30.7 | A1 | This mark is given for an answer in range <br> 30.6 to 30.7 |
